BREAKTHROUGH DESIGN

Simple and contemporary design characterise the slimmest pump coffee machine on the market. At only 15cm wide, the machine is designed to fit any kitchen or office space.

HIGH PERFORMANCE

The Thermoblock only heats enough water for your coffee serving, achieving a stable and accurately controlled water temperature that is crucial for brewing the ideal coffee.

This reduces warm-up time, so that your coffee machine is ready for use in seconds, and is more energy efficient. The coffee temperature can be tailored further in the menu settings.

2-IN-1 FILTER HOLDER

The EC680 allows you to make an excellent espresso or a smooth cappuccino, typical of a barista, thanks to the 500 gram professional filter holder. Designed to be used both with ground coffee or ESE pods, the filter holder is equipped with 3 interchangeable stainless steel filters to prepare one or two coffees, when using ground coffee, or to use the ESE pod.

Extended details

Design	
Case design	Freestanding
Product type	Espresso machine
Colour of product	Red
Built-in display	-
Control type	Buttons, Rotary
Performance	
Coffee input type	Coffee capsule, Ground coffee
